

Nyloxin™

Chronic Pain Relief

Testimonials

I have Trigeminal Neuralgia that causes a lighting bolt pain on the left side of my face. On a pain scale of 1-10 with 10 being the worst, the pain is usually a 13, which means I will not be able to even eat for hours or days! Before using Nyloxin I had constant pain, but it would get worse several times a day even hourly some days. After using the Nyloxin I was pain free for several days at a time. Then when the pain started up again I would spray the Nyloxin and the pain would go away again for several days! I have tried many prescription products including Tegretol and Carbamazepine with no results. Nyloxin is the only product that has given me relief. Is there anything we can do to get on an automatic order so that I never run out - is that possible at this time?

Sincerely,
Kristen D.

A few months ago I tried Nyloxin for the first time. I was more than skeptical in the beginning. Having horrible migraines for 20 years and having tried everything that's on the market, prescription or over the counter drugs, I was actually almost amused by the fact that a spray should help. But I was proven wrong. Nyloxin really works. And it works fast. Now, as soon as I feel a migraine or headache coming up I spray Nyloxin under my tongue and 20 minutes later I am pain free. And not just that it makes the pain disappear, contrary to all the other medications I took before, Nyloxin is absolutely gentle on my stomach. I feel no pressure in my belly, no nausea and no heartburn. How much better can it get? I love it.

I have been suffering from joint and back pain for years. As a cabinet maker, long hours of standing, kneeling and lifting were finally taking a toll on me. My friend gave me Nyloxin to try, and I have to say it makes my daily life so much more enjoyable. Just a few pumps of Nyloxin make my pain go away in minutes, and it lasts the whole day. I feel years younger without the constant pain, thanks to Nyloxin!
